

Deploy HelloWorld JSP App

HelloWorld JSP

HelloWorld JSP

- As Proof-of-Concept, deploy HelloWorld JSP on Elastic Beanstalk

HelloWorld JSP

- As Proof-of-Concept, deploy HelloWorld JSP on Elastic Beanstalk
- Simple app on the Java side

HelloWorld JSP

- As Proof-of-Concept, deploy HelloWorld JSP on Elastic Beanstalk
- Simple app on the Java side
- Focus on the deployment process to Elastic Beanstalk

HelloWorld JSP

- As Proof-of-Concept, deploy HelloWorld JSP on Elastic Beanstalk
- Simple app on the Java side
- Focus on the deployment process to Elastic Beanstalk

We'll do advanced Spring with Database CRUD in later videos ...

Development Process

Step-By-Step

Development Process

Step-By-Step

1. Download the app and import into Eclipse

Development Process

Step-By-Step

1. Download the app and import into Eclipse
2. Package the WAR file using Maven

Development Process

Step-By-Step

1. Download the app and import into Eclipse
2. Package the WAR file using Maven
3. Create a new application in Elastic Beanstalk

Development Process

Step-By-Step

1. Download the app and import into Eclipse
2. Package the WAR file using Maven
3. Create a new application in Elastic Beanstalk
4. Upload the WAR file to Elastic Beanstalk
